

CoLink® Sfx

INDICATIONS

The In2Bones USA CoLink® Sfx Implant System is a system of implantable K-wires and caps indicated for temporary fixation and stabilization of bone fractures and reconstructions. In addition, the K-wires can be used as guide pins for insertion of other implants. The caps are indicated for use in the protection of protruding ends of wires.

CONTRAINDICATIONS

- Bone, musculature, tendons, or adjacent soft tissue compromised by disease, infection, or prior implantation, which cannot provide adequate support or fixation for the implant.
- Known metal allergy
- Diabetes
- Active infection in the join
